表 2: 与当前最先进（SOTA）的 MMDocQA 方法的比较。基于纯 LVLM 和基于 RAG 的方法均使用准确率（%）作为评估指标。

Category	Method	MMLongBench	LongDocURL	PaperTab	PaperText	FetaTab	Avg
LVLM-based	Qwen-2.5-VL-7B-Instruct	0.204	0.398	0.156	0.203	0.350	0.274
	LLaVA-1.6-7B-Instruct	0.176	0.110	0.102	0.178	0.301	0.173
RAG-based	MDocAgent (Top-4)	0.338	0.561	0.347	0.536	0.640	0.484
	Ours (Top-1)	0.350	0.568	0.362	0.508	0.669	0.437
	Ours (Top-4)	**0.432**	**0.607**	**0.390**	**0.567**	**0.725**	**0.544**
	Improvement (%)	27.8%	8.2%	12.3%	5.8%	13.3%	12.4%

表 3: 消融实验结果。前三个列表示配置中是否使用了结构化语义检索、文本特征检索和视觉特征检索。

Variants	Configuration			Evaluation Benchmarks					
	Text	Image	DMAP	MMLongBench	LongDocURL	PaperTab	PaperText	FetaTab	Avg. Acc
w/o DMAP	✓	✓	✗	0.320	0.534	0.337	0.531	0.514	0.447
w/o Image	✓	✗	✓	0.380	0.593	0.385	0.565	0.705	0.526
w/o Text	✗	✓	✓	0.390	0.482	0.219	0.223	0.659	0.394
Full	✓	✓	✓	**0.432**	**0.607**	**0.390**	**0.567**	**0.725**	**0.544**

FetaTab: Ours(Top-4) 0.725: results/FetaTab/ftb_gpt/2025-08-21-18-16_results.json

```
我在看师兄FetaTab数据集问答错误案例，请帮我分析其错误原因（输出答案和标注答案差别），错误类型，还有分析师兄方法是哪里出问题导致问答错误，输出json格式，包括中文问题，错误类型，答案比对错误原因，师兄方法问答过程中导致回答错误原因分析，原文（data/FetaTab）中证据
```

FetaTab问答错误案例分析

1/274:

```
    "question": "What year did Philip I the Amorous become King of the Franks, what year did that run end, and what number king was he?",
    "answer": "Philip I the Amorous, was King of the Franks from 1060 to 1108, the fourth from the House of Capet."
    "ans_ftb_gpt": "Philip I the Amorous became King of the Franks on August 4, 1060, and his reign ended on July 29, 1108. He was the sixth king in the Capetian line of monarchy.
```

多阶段复合错误, “国王年份答对了，但‘第几位国王’这一步被带偏，最后汇总也选错”

真正**关键页**是 **Page 15**,这里连续列了 Hugh Capet -> Robert II -> Henry I -> Philip I，所以 Philip I 是该段第4位。

LocateAgent 误定位（结构路偏移）：把注意力拉到 **9/10/23**，导致后续上下文注入了大量无关“王朝编号”噪声。

文本路本身有命中正确页，但被噪声稀释text-top-10 前两位是 14/15（即 Page15/16），本来接近正确；但定位页会被前插，最终上下文里无关页占比上升。

Agent 输出出现冲突: r_general：第6位（错）；r_text：第7位（错）；r_image：第4位（对）

总结: 年份信息易抽取且一致，错误集中在“第几位”定义；**定位页偏移**+**上下文噪声**导致general/text分支误计数，sum阶段采纳了错误共识。

"**error_type**": ["结构定位偏移（Locate误定位）", "序号推理错误（ordinal counting）", "多Agent融合失败（正确分支未被采用）"]

2/274:

```
"question": "Jayne 在 2016 年有没有进入 Billboard 的某个排行榜前列？",
"answer": "Jayne 在 2016 年被 Billboard 评为“Next Big Sound”第三名。",

"r_general": "有，Erika Jayne 在 2016 年进入了 Billboard 的多个排行榜前列：\n\n1. **Next Big Sound**：她排名**第 3**。\n2. **有史以来最伟大的 Top Dance Club Artists 100 强**：她排名**第 42**。\n\n这些成绩表明她在那一年获得了音乐行业的认可。",

"r_text": "有，Jayne 在 2016 年进入了 Billboard 的一个排行榜前列，她在 Billboard 的 Next Big Sound 排行榜中排名第 3。",

"r_image": "无法回答。",

"ans_ftb_gpt": "```json\n{\"Answer\": \"Erika Jayne 在 2016 年 Billboard 的 Next Big Sound 排行榜中排名第 3，并在有史以来最伟大的 Top Dance Club Artists 100 强中排名第 42。\"}\n```",
```

- r_text 实际是正确方向：只回答了 2016 Billboard Next Big Sound 第3。
- r_general 把 Page 11 另一条 42nd 也并入，形成“过度回答”。
- r_image 是 Not answerable，所以没有提供纠偏。
- SumAgent 最后采用了 general + text 的合并版本，把 42nd保留下来，导致判错。

总结: 文本分支原本**已有简洁准确的事实陈述**，但综合/总结分支却加入了**额外的排序内容**，从而违背了数据集所设定的明确答案要求。(**综合分支**的冗长答案**干扰**了简短的text agent问答分支答案)

3/274:

```
"question": "Nadiya Hussain 获得过哪些奖项提名？",
"answer": "Nadiya Hussain 曾凭借《Bake Me A Story》入围英国图书奖（British Book Awards）的“年度儿童图书奖”，并凭借《The Chronicles of Nadiya》获皇家电视学会奖（Royal Television Society Awards）的“突破之星”提名。",
```

"关键证据页": { "Page_1": "正文引言里就是标准答案那**两条提名**（与GT高度 一致）。", "Page_6": "“Awards and nominations”总**表**，**既有提名也有获奖**，信息更全但更容易越界。" }

summary定位location: ["Page 6","Table 6"(表中含有**提名**和**获奖**全部信息)]

"**error_type**": ["范围漂移（从“被提名”扩展为“全部奖项信息”）", "标签混淆（把“获奖 Won”也当成问题答案输出）", "与标注口径不一致（标注只保留两条代表性提名）"]

总结: 该错例不是没检索到，而是“**检索过全** + **生成未约束**”。Page 6奖项总表被定位后，General/Text/Image分支都倾向输出**完整奖项清单**，并混入**获奖项**；Sum阶段继续保留这些扩展信息。数据集标注口径更窄，只认可两条提名，因此被判错。

5/274:

"**问题**问的是“2014年 Arifin Putra是否获得最佳男配角”，**文档证据**明确支持“**是**”。但标准答案写成了“2014 Phoenix Film Critics Society Awards 的两项提名（Best Stunts / Best Foreign Language Film）”，这是同页另 一组奖项信息，和问题主体不一致，属于题目与答案错配。"

总结: 数据集标注噪声/题答错配（题答错配）

6/274:

"**question**": "哪一个飓风季节中四级飓风最严重，一共有多少个？",

"**answer**": "1999 年大西洋飓风季共有 5 个四级飓风——这是大西洋盆地单个飓风季中记录到的最高数量。"

Name	Season	Month	Max. sustained winds			Minimum pressure
			(Knots)	(km/h)	(mph)	(mbar)
Hurricane Ella	1978	August, September	120	220	140	956

Hurricane Edouard	1996	August, September	125	230	145	933
Hurricane Hortense	1996	September	120	220	140	935
Hurricane Georges	1998	September, October	135	250	155	937
Hurricane Bret	1999	August	125	230	145	944
Hurricane Cindy	1999	August	120	220	140	942
Hurricane Floyd	1999	September	135	250	155	921
Hurricane Gert	1999	September	130	240	150	930
Hurricane Lenny	1999	November	135	250	155	933
Hurricane Isaac	2000	September, October	120	220	140	943
Hurricane Keith	2000	September, October	120	220	140	939
Sources: Atlantic Hurricane Best Track File 1851–2012[15]						

Hurricane frequency

Period	Number	Number per year
1851–1900	13	0.26
1901–1950	29	0.58
1951–1975	22	0.88
1976–2000	24	0.96
2001–present	24	1.4

HDMP回答: 四级飓风最严重的时期出现在 1901 年至 1950 年之间，这一时期大西洋盆地共形成了 29 个四级飓风。

总结: 语义错位（season 被误读为 period）+ 表格计数推理失败 + 多路融合选错

7/274:

问题要求的是“美国（国籍）硬摇滚艺人里销量最高的是谁、卖了多少”。系统把“United States”误读成“美国市场销量”，并在已命中的页面里选了 Led Zeppelin的美国认证销量（140 million certified units）；同时没有命中/使用包含 Aerosmith 的关键页面，最终实体和销量口径都错了。

总结: **检索召回缺失**,在summary定位,top-10文本路检索未检索到关键页page15, 图像路检索top-8为关键页page 15, 但是太靠后,导致问答都失败;

8/274:

"question": "最大的岛屿有哪些？",

"answer": "最大的三个岛屿是印度尼西亚的爪哇岛、日本的本州岛，以及英国的大不列颠岛。"

Population over 10 million

Ranking	Island	Population	Density (/km²)	State(s)
–	*Afro-Eurasia*	*6,151,810,000 (2013)*	*72.4*	
–	*Americas*	*1,001,559,000 (2016)*	*23.5*	
1	Java	141,370,000 (2015) [1][2]	1,117	Indonesia
2	Honshū	104,000,000 (2010) [3][4]	451.8	Japan
3	Great Britain	64,163,534 (2017) [5]	306.5	United Kingdom
4	Luzon	60,770,440 (2018)[6]	480	Philippines
5	Sumatra	50,180,000 (2015)[7][8]	90.4	Indonesia
6	Madagascar	25,571,000 (2017) from poplist	43.5	Madagascar
7	Mindanao	25,537,691 (2018)[9]	261.4	Philippines

HDMP回答了十个最大的岛屿, 但是问答标注答案只列出了前三个岛屿;

总结: 问题与标注只需要前三大岛（Java、Honshu、Great Britain），模型却输出了前10+。前3项其实是对的，但因输出超出目标范围被判错。 属于过度回答（范围扩张）

9/274:

```
"question": "《超人前传》（Smallville）在播出期间表现最好的是哪一季？",
"answer": "《超人前传》共播出十季，平均每集观众人数为若干百万，其中第二季的收视率最高，达到 630 万。"
模型答案：《超人前传》在播出期间表现最好的是第二季，其首播观众人数最高，达到 870 万
```

Season	Timeslot (ET/PT)	Network	Premiered		Ended		Rank	Viewers (in millions)
			Date	Premiere Viewers (in millions)	Date	Finale viewers (in millions)		
1 (2001–02)	Tuesday 9/8C		October 16, 2001	8.40[105]	May 21, 2002	6.00[106]	115[107]	5.90[107]
2 (2002–03)			September 24, 2002	8.70[108]	May 20, 2003	7.50[109]	113[110]	6.30[110]

模型选了 Season 2 的首播收视8.70M，而该表说明“season rankings based on average viewers per episode”，Season 2 对应应取 6.30M。季别答对，数值口径答错。"

总结: 指标读错（Premiere vs 平均季收视）

10/274:

```
"question": "南阿马郡狙击手使用 7.62×51 毫米子弹杀害了多少名英国安全部队成员？",
"answer": "在南阿马郡狙击手（1990–1997）行动中，有三名安全部队成员死于 7.62×51 毫米子弹。",

"r_general": "根据所提供页面中提取的信息，南阿马郡狙击手使用 7.62×51 毫米子弹对英国安全部队造成的伤亡如下：\n\n- **7 名士兵被杀**\n- **2 名警员被杀**\n- **1 名警员受伤**\n\n这意味着，共有 **9 名英国安全部队成员（7 名士兵和 2 名警员）** 被杀。文中还指出，另有 5 次未命中的射击也使用了同一种武器（7.62 毫米），这表明虽然他们试图造成更多伤亡，但这些射击并未导致额外死亡。\n\n总体而言，在这场狙击行动中，明确死于上述子弹的共有 7 名士兵和 2 名警员。",
"r_text": "有三名英国安全部队成员被南阿马郡狙击手使用 7.62×51 毫米子弹杀害。",
"r_image": "有三名安全部队成员死于 7.62×51 毫米子弹。",

"ans_ftb_gpt": "```json\n{\"Answer\": \"共有九名英国安全部队成员（7 名士兵和 2 名警员）被南阿马郡狙击手使用 7.62×51 毫米子弹杀害。\"}\n```"
```

原文证据清清楚楚: **Three** of the security forces members killed in this campaign were instead the victims of 7.62×51mm rounds.

总结: 单text_agent和image_agent的问答结果正确, general_agent的问答结果错误,混淆了口径,增加了伤亡人数;(推测是给大模型输入过多过杂,产生了噪声), 继而导致融合的问答结果也出错;

12/274:

"question": "How did Billy Elliot perform in the 2007 Sydney Theatre Awards?"

2007	Sydney Theatre Awards	Best Production of a Musical		Won
		Best Performance by an Actor in a Musical	Rhys Kowsakowski, Rarmian Newton, Nick Twiney and Lochlan Denholm	Won
		Best Performance by an Actress in a Musical	Genevieve Lemon	Won
		Best Production Music Theatre		Won

总结: [**跨年份表格混读 + 过度回答**]2007 Sydney Theatre Awards 这题应是“提名3项且3项全赢”。模型把相邻年份/其他奖项（如Best Direction、Best Choreography 等）混入，导致答案超出该奖项年份范围。"

13/274:

```
 "question": "How did Game of Thrones perform in the Satellite Awards in 2013?",
"answer": "\"Game of Thrones\" won the Satellite Award for Best Television Series while Nikolaj Coster-Waldau and Emilia Clarke received nominations for Best Supporting Actor, and Best Supporting Actress.",

"ans_ftb_gpt": "```json\n{\"Answer\": \"Overall, \\\"Game of Thrones\\\" won one award out of the three categories in which it was nominated during the 2013 Satellite Awards.\"}\n```",
```

general_agent和text_agent的回答都准确, r_image回答不太准确,给出“没获奖”的冲突信号。;

总结: [**欠回答（关键信息被压缩）**]SumAgent汇总的最终答案被压缩成“3提名中1获奖”，**丢失**了题目需要的**具体人名**与**奖项细节**;

15/274:

"问题问的是“被 redefined 成多少 kg”，样本语境是荷兰1817 年的 steen。text/image 路已给出 3 kg，但最终选了 general 路的现代英制定义（14 lb=6.35029318 kg），导致口径错位。"

(证据)page6明确写到：Netherlands 1817 将 steen 从 8 Amsterdampound（3.953 kg）重定义为 3 kg。

摘要也定位到了page 6;

总结: [**历史语境误读 + 融合选错**] text,image回答准确,general回答错误,最终导致融合回答错误;

16/274:

"question": "Cleopa Msuya 在哪些日期担任坦桑尼亚总理？"

3	**Cleopa Msuya** (1931–)		7 November 1980	24 February 1983	style="background: Template:Chama cha Mapinduzi/meta/color;" |	Chama Cha Mapinduzi	Nyerere
(2)	**Edward Sokoine** (1938–1984)	—	24 February 1983	12 April 1984 (*died in office.*)	style="background: Template:Chama cha Mapinduzi/meta/color;" |	Chama Cha Mapinduzi	Nyerere
4	**Salim Ahmed Salim** (1942–)		24 April 1984	5 November 1985	style="background: Template:Chama cha Mapinduzi/meta/color;" |	Chama Cha Mapinduzi	Nyerere
5	**Joseph Warioba** (1940–)	—	5 November 1985	9 November 1990	style="background: Template:Chama cha Mapinduzi/meta/color;" |	Chama Cha Mapinduzi	Mwinyi
6	**John Malecela** (1934–)		9 November 1990	7 December 1994	style="background: Template:Chama cha Mapinduzi/meta/color;" |	Chama Cha Mapinduzi	Mwinyi
(3)	**Cleopa Msuya** (1931–)		7 December 1994	28 November 1995	style="background: Template:Chama cha Mapinduzi/meta/color;" |	Chama Cha Mapinduzi	Mwinyi Mkapa

错误原因: Cleopa Msuya 在表中有两段任期。general 路给出了**两段(正确答案)**，但 text/image 路只抓到第一段，最终答案被截断成单任期。

总结: [**欠回答**]多任期实体**遗漏** + 融合偏向**不完整**分支

20/274:

"question": "What roles has Gurnam Singh served?",

"answer": "Gurnam Singh was **the Chief Minister of Punjab** from 8 March 1967 to 25 November 1967, and again between 17 February 1969 to 27 March 1970."

Chief Minister of Punjab (Since 1966)

№	Name (birth–death); constituency	Portrait	Party (coalition with)	Term of office[3]			Elections (Vidhan Sabha)	Appointed by(Governor)
5	Giani Gurmukh Singh Musafir (1899–1976) MLC in Vidhan Parishad		Indian National Congress	1 November 1966	8 March 1967	127 days	— (3rd)	Dharma Vira

Map of present Punjab in red color

6	Gurnam Singh (1899–1973) MLA for Qila Raipur		Akali Dal - Sant Fateh Singh (BJS and CPI)	8 March 1967	25 November 1967[RES]	262 days	1967 (4th)	
7	Lachhman Singh Gill (1917–1969) MLA for Dharamkot		Punjab Janta Party (INC)	25 November 1967	23 August 1968	272 days		D. C. Pavate
(iii)	Vacant[a] (President's rule)		None	23 August 1968	17 February 1969	178 days	—	*Zakir Hussain*
(6)	Gurnam Singh (1899–1973) MLA for Qila Raipur		Shiromani Akali Dal	17 February 1969[§]	27 March 1970[RES]	1 year, 38 days	1969 (5th)	D. C. Pavate

"ans_ftb_gpt": ""Gurnam Singh served as an **MLA for Qila Raipur** from March 8, 1967, to November 25, 1967, and again from February 17, 1969, to March 27, 1970, representing the Akali Dal - Sant Fateh Singh coalition."

总结: 表格列语义误读（把“MLA/选区”当成问题所问“职务任期”）

21/274:

"question": "Who was the first Chief Minister of Punjab, and when were they the Chief Minister?"(旁遮普邦的第一任首席部长是谁？他在什么时候担任首席部长？）

№	Name (birth–death); constituency	Portrait	Party (coalition with)	Term of office[3]			Elections (Vidhan Sabha)	Appointed by(Governor)
1	Gopi Chand Bhargava (1889–1966) MLA for University		Indian National Congress	15 August 1947	13 April 1949[NC]	1 year, 241 days	- (Interim Assembly)	Chandulal Madhavlal Trivedi
2	Bhim Sen Sachar (1894–1978) MLA for Lahore City			13 April 1949	18 October 1949[RES]	188 days		
(1)	Gopi Chand Bhargava (1889–1966) MLA for University			18 October 1949[S]	20 June 1951[RES]	1 year, 245 days		
(i)	Vacant[a] (President's rule)		None	20 June 1951	17 April 1952	302 days	—	*Rajendra Prasad*
(2)	Bhim Sen Sachar (1894–1978) MLA for Ludhiana City South		Indian National Congress	17 April 1952[S]	23 January 1956[RES]	3 years, 281 days	1952 (1st)	Chandulal Madhavlal Trivedi
3	Partap Singh Kairon (1901–1965) MLA for Sujanpur			23 January 1956	9 April 1957	8 years, 150 days		Chandeshwar Prasad Narayan Singh
				9 April 1957	11 March 1962		1957 (2nd)	
				11 March 1962	21 June 1964[RES]			Narhar Vishnu Gadgil
(1)	Gopi Chand Bhargava (1889–1966) MLC in Vidhan Parishad			21 June 1964[S]	6 July 1964[RES]	15 days	1962 (3rd)	Hafiz Mohamad Ibrahim

总结: [**回答不完整**, 首段命中、后续同名记录漏聚合]模型正确识别了“第一任是 Gopi Chand Bhargava”，但只给了第一段任期，漏掉同页表格中的第二、第三次任期。(我感觉是问题没有明确问这个人的所有任期时间,问题问的很片面)

22/274:

```
"question": "When was Parkash Singh Badal the Chief Minister of Punjab state?",
"answer": "Parkash Singh Badal is an Indian politician who was Chief Minister of Punjab
state from 1970 to 1971, from 1977 to 1980, from 1997 to 2002, and from 2007 to 2017."
```

总结:[答案生成阶段中多片段聚合失败] 最终答案给出了 1970-1971、1997-2002、2007-2017，但漏掉 1977-1980。该信息在同文档中是显式存在的，说明不是纯检索不到，而是多证据合并时中间时间段被丢失。

24/274:

问题: 3.0L Duratec 和 I4 引擎的 power efficiency 是什么?

总结: [**跨版本证据混用**（问题也没问清楚是哪个版本）]文档同时有旧款3.0L=221hp和改款3.0L=240hp；模型采用了旧款221hp口径，和标注答案所用的240hp口径不一致。

25/274:

问题: Koresh 在哪一年成为“king of Persia”，这个称号是谁引入的?

总结: [**summary定位证据页失败**]摘要locate未定位到证据页,导致未正确回答“称号由谁引入”

27/274:

"question": "What was the death count and the damage (in USD) for America during hurricane Wilma?"

"answer": "In Hurricane Wilma, 62 deaths were reported and damage totaled to $27.4 billion, of which $19 billion occurred in the United States."

Impact by country

Region	Deaths	Damage (USD)
The Bahamas	1	$100 million
Cuba	4	$700 million
Haiti	12	$500,000
Jamaica	1	$93.5 million
Mexico	8	$7.5 billion
United States	62	$19 billion
Total	**87**	**$27.4 billion**

师兄答案: "The United States experienced 62 deaths and $19 billion in damage due to Hurricane Wilma."

总结: [**答案口径不一致**]（仅答美国分项，未覆盖总量上下文）, 问题也只问了美国的损失金额和伤亡, 标注答案多给了总损失金额,导致对不上,非模型问题;

28/274:

"问题": "What are the two longest-running prime-time American television series and what were their genres?"

Longest telecasted series

Series shaded in light blue are currently in production.

50 seasons or more

Number of seasons	Series	Genre/Subject	Network	First broadcast	Last broadcast	Number of episodes
64	*Hallmark Hall of Fame*[1]	Anthology	NBC	Dec 24, 1951	Dec 17, 1978	354
			CBS	Nov 14, 1979	April 30, 1981	
			PBS	Feb 9, 1981	May 6, 1981	
			CBS	Dec 1, 1981	Jan 29, 1989	
			ABC	April 30, 1989	April 23, 1995	
			CBS	Dec 10, 1995	April 24, 2011	
			ABC	Nov 27, 2011	April 20, 2014	
			Hallmark Channel	Nov 30, 2014	**present**	
53	*Walt Disney Presents*[2]	Anthology	ABC	Oct 27, 1954	June 11, 1961	1,224
			NBC	Sep 24, 1961	Aug 16, 1981	
			CBS	Sep 26, 1981	May 3, 1983	
			ABC	Feb 2, 1986	May 22, 1988	
			NBC	Oct 9, 1988	Aug 26, 1990	
			Disney Channel	Sep 23, 1990	Sep 21, 1997	
			ABC	Sep 28, 1997	Dec 24, 2008	
			Disney Junior	March 23, 2012	**present**	
50	*60 Minutes*	News Magazine	CBS	September 24, 1968	present	2325+

错误原因: 输出答案给了“The Simpsons 和 60 Minutes”，且未完整给出所需的genre字段；标注答案对应的是按“seasons排序”的前两名：Hallmark Hall of Fame 与 Walt Disney Presents（均为Anthology）。

"location": [

"Page 2",

"Page 3",

"Page 34",

"Page 35",

"Page 36",

"Page 37"

] 关键证据在Page2的表格中,location定位到的不相关page过多

总结: [**排序依据误判**,**表格读取失焦**,答案**字段缺失**（未给genre）] 检索与生成**被**文档中**大量与The Simpsons相关**内容**吸引**，**未强约束**到“Page 2表格前两行”。同时缺少“按seasons取top-2并输出genre”的结构化后处理，导致选错对象且漏字段。

30/274:

"问题": "What are the median salary rangesfor associate and full professors,respectively?"(助理教授和正教授的平均薪资范围分别是多少?)

标注答案: "For associate professors, salaries ranged **from $56,943 to $98,530**, while salaries among full professors ranged **from $68,214 to $136,634**."

Rank	Lowest median by field[31]	Highest median by field[31]	Overall median[30]
Assistant professor	$45,927	$81,005	$58,662
Associate professor	$56,943	$98,530	$69,911
Full professor	$68,214	$136,634	$98,974

locate定位很精准,命中关键证据页page11;

师兄answer给的是“associate 69,911；full 98,974”（overall median单值）；标注答案要的是“associate 56,943-98,530；full 68,214-136,634”（range范围）。

总结: [**表格列选择错误**,范围值与中位值混淆,**多路融合偏置**] 同一表格有“Lowest median / Highest median /Overall median”多列。模型把问题里的“median salary ranges”误读为“overall median”，且最终融合偏向**r_general/r_text回答**的**单值**，未采用**r_image回答**中的**正确**范围列。

36/274:

"question": "What roles did Bethany Joy Lenz play in 2000 and 2005?"

Theatre

Year	Title	Role	Director
1988	*The Wonderful Wizard of Oz*	Munchkin	

Year	Title	Role	Director
	Gypsy	Baby June	
1991	*To Kill a Mockingbird*	Scout	Scott Jacoby Matt Moses
1999–2000	*Foxy Ladies Love/Boogie 70's Explosion*	Performer	Fritz Brekeller
2000	*The Outsiders*	Sandy	Arthur Allan Seidelman
2005	*Happy Days*	Pinky Tuscadero	Garry Marshall
2012	*CATS* for Cats	Performed "Macavity"	Shawn Simons
2014	One Starry Night Gala	Performed "On the Steps of the Palace"	
2018	CATstravaganza: Hamilton's Cats Musical	Performed "Buenos Aires"	

答案比对错误原因: "输出答案给的是 2000 年《Mary and Rhoda》Rose Cronin + 2005 年《Happy Days》Pinky Tuscadero；标注答案要求 2000 年《The Outsiders》+ 2005 年《Happy Days》Pinky Tuscadero。差异集中在“2000年角色来源”。"

Film

Year	Film	Role	Notes
1992	*Psalty's Salvation Celebration*	Shelly Barnes	
1996	*I Love You, I Love You Not*	Extra	Uncredited
	Thinner	Linda Halleck	
2000	*Mary and Rhoda*	Rose Cronin	
2004	*Bring It On Again*	Marni Potts	
2011	*Just Yell Fire: Campus Life*	Herself	
2017	*Extortion*	Julie Riley	

总结: [**证据选择偏差**（电影表 vs 舞台表）]检索命中 Page 6（影视作品）和 Page 8（舞台角色）两套信息。融合阶段对2000年优先采用影视表（Rose Cronin），没有按题目与标注偏好的舞台语境（The Outsiders）统一口径，导致年份对应角色选错。

43/274:

```
"question": "Where are the surviving, airworthy Avro Lancasters located?" (现存且仍具适航能力的 Avro Lancaster 位于哪里？)
"answer": "The Canadian Warplane Heritage Museum and the RAF Coningsby have the only two airworthy Lancasters in the world."
```

模型输出错误对比: 模型**部分命中**了 RAF Coningsby 和 FM213，但把“适航中”和“正在恢复到适航状态”**混淆**，导致把NX611一并带入；同时**遗漏**了FM213对应的**关键地点名称**Canadian Warplane Heritage Museum。

总结:[**Location定位未显式命中关键页**,多代理汇总失败] **location/检索**没有稳定覆盖两条正确表格行，再叠加status 语义混淆和**汇总去噪失败** (把多个分支的冲突信息拼接在一起，产生部分正确但整体错误的答案)。

44/274:

```
"question": "Which two tracks did Eldritch write on the album \"No time to cry\"?" (Eldritch 为《No Time to Cry》写的是哪两首歌？)
"answer": "\"Blood Money\" and \"Bury Me Deep\" off of the album \"No Time to Cry\" were by Eldritch."
```

location 命中了 Page 5 和 Page 8, 关键证据页是Page 8的表格关系;

总结: [**汇总选错分支**] **image_agent**分支给出的答案完全**正确**,但是SumAgent **没有正确识别** image agent 才是唯 一与表格证据一致的分支，而是**保留**了 general agent 的**错误强结论**。
